No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 1,

Patent No. 645864;
SERENAL INFORMATION:
APPLICANT: Andrade-Gordon, Patricia
APPLICANT: Darrow, Andrew
APPLICANT: Darrow, Andrew
TITLE OF INVENTION: DNA encoding the novel human serine;
TITLE OF INVENTION: DNA encoding the novel human serine;
TITLE OF INVENTION: DNA encoding;
TITLE REPERENCE: ORT-1032;
CURRENT APPLICATION NUMBER: US/09/386,653A.
CURRENT FILING DATE: 1999-08-31
NUMBER OF SEQ ID NOS: 11
SOFTWARE: PATENTIN Ver. 2.0
SEQ ID NO 1
LENGTH: 1110
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      1110
